925	Challenges in solid-liquid separation: Thickener theory and applications	01. Plenary Session	101
931	Lower operating costs through enterprise dynamic performance management	01. Plenary Session	102
929	Sustainability and public engagement in mining: The role of engineers	01. Plenary Session	103
952	A new approach to assessing energy efficiency, grindability and HPGR technology by comminution research	01. Plenary Session	104
928	Reducing whole of enterprise running costs through coarse particle flotation	01. Plenary Session	105
923	Drivers that will change the design and plant operation in the mining industry	01. Plenary Session	106
911	A crystal ball vision of innovation in mineral processing	01. Plenary Session	107
922	Overcoming sustainability challenges of future concentrator plants	01. Plenary Session	108
930	Minería sustentable en Antofagasta Minerals	01. Plenary Session	109
813	Frother effect on bubble size in the presence of structure making and structure breaking salts	02. Flotation Fundamentals	201
61	Effect of regrinding conditions on the flotation of sulphide minerals in the cleaner stage	02. Flotation Fundamentals	202
286	Identification of surface chemical factors effecting Pb recovery in a lead/zinc circuit	02. Flotation Fundamentals	203
323	Electrochemical study of sulfide flotation: Short story	02. Flotation Fundamentals	204
484	Characterizing flotation recovery variability of copper ores	02. Flotation Fundamentals	205
491	The use of esterification to create hydrophobic quartz particles for flotation	02. Flotation Fundamentals	206
660	A frother characterization technique using a lab mechanical flotation cell	02. Flotation Fundamentals	207
723	Interrelation of site population of calcic amphiboles with their electrochemical and flotation properties	02. Flotation Fundamentals	208
936	Electrokinetic behavior of egyptian coal in the presence of some nonionic surfactants	02. Flotation Fundamentals	209
10	Surface species, roughness and hydrophobicity of enargite under electrochemically-controlled oxidation	02. Flotation Fundamentals	210

21	A new insight into oxidation mechanisms of sulphide minerals	02. Flotation Fundamentals	211
35	Separation mechanism of tennantite and chalcopyrite with flotation after oxidation using oxygen	02. Flotation Fundamentals	212
62	The flotation of pyrite and chalcopyrite in the presence of biopolymers	02. Flotation Fundamentals	213
68	Study on activation property and mechanism of metal cations in wolframite flotation	02. Flotation Fundamentals	214
96	Adsorption of carboxymethyl cellulose on talc basal and edge surfaces probed by atomic force microscope	02. Flotation Fundamentals	215
111	Effect of Fe(II) on calcite and smithsonite flotation	02. Flotation Fundamentals	216
122	Measuring the induction time for particle–bubble attachment in flotation	02. Flotation Fundamentals	217
185	Application of ultrasonic irradiation to micro-bubble flotation	02. Flotation Fundamentals	218
193	The effect of polymers on wettability of bitumen	02. Flotation Fundamentals	219
228	Selective flotation of chalcopyrite and molybdenite by surface oxidation	02. Flotation Fundamentals	220
233	Flotation of chalcopyrite and pyrite in sea water	02. Flotation Fundamentals	221
246	Activation/depression of sphalerite by calcium sulfate in flotation water	02. Flotation Fundamentals	222
277	Cryo-SEM imaging of aggregate structures of clay minerals in flotation pulp and froth	02. Flotation Fundamentals	223
279	Direct measurement of hydrodynamic and surface forces in bubble-particle interactions	02. Flotation Fundamentals	224
332	Necessary conditions for mineral–bubble aggregate formation during flotation	02. Flotation Fundamentals	225
342	Critical Coalescence Concentration (CCC) for surfactants in aqueous solutions	02. Flotation Fundamentals	226
361	Electrochemical interactions of some platinum group minerals with flotation reagents	02. Flotation Fundamentals	227
426	Copper ion activation on different origin pyrite	02. Flotation Fundamentals	228
434	Influence of additives on gas holdup and bubble size	02. Flotation Fundamentals	229
463	Influence of clays on induction time, floatability and foam stability in the process of flotation of copper sulphide minerals	02. Flotation Fundamentals	230

479	Break-up in formation of small bubbles: Salts and frothers	02. Flotation Fundamentals	231
597	Colloidal probe atomic force microscopy to determine the floatability of minerals in ores	02. Flotation Fundamentals	232
599	Plate type gangue minerals and their impact on flotation performance	02. Flotation Fundamentals	233
698	Study of froth recovery and froth dropback behaviour in a controlled plant environment	02. Flotation Fundamentals	234
748	Physicochemical interactions of mineral fines and their effects on selective mineral separations	02. Flotation Fundamentals	235
757	Jajoba oil as an alternative collector in the selective flotation of apatite and calcite at slightly acid conditions	02. Flotation Fundamentals	236
760	Gas dispersion properties of fatty acids	02. Flotation Fundamentals	237
779	Electrochemical flow cell for mineral processing	02. Flotation Fundamentals	238
843	Peak Air Recovery: An investigation into the effect of particle size	02. Flotation Fundamentals	239
117	Effect of frother on flotation of pyrite and silica	02. Flotation Fundamentals	240
897	Flotation in highly concentrated electrolyte solutions	03. Flotation Chemistry	301
913	Mineral processing and environmental bioremediation: A general review	03. Flotation Chemistry	302
160	Design and development of novel mineral-specific collectors for flotation	03. Flotation Chemistry	303
161	Molecular recognition in mineral flotation: selectivity in apatite-calcite system	03. Flotation Chemistry	304
196	Flotation of sulfide minerals from copper ores in the presence of either nonpolar or thiol collectors	03. Flotation Chemistry	305
335	N-carboxymethyl chitosan in differential flotation of galena and chalcopyrite	03. Flotation Chemistry	306
368	Development of anionic collectors for direct flotation of apatite from complex siliceous ores with a focus on sustainability	03. Flotation Chemistry	307
436	Utility of DNA isolated from Bacillus circulans for the selective flotation of sphalerite from galena	03. Flotation Chemistry	308
455	Application of plant extracts as modifiers for selective flotation of sulfide minerals	03. Flotation Chemistry	309
461	Evaluation of phosphate depressants in the phosphate/dolomite system	03. Flotation Chemistry	310

489	Polymer depressant adsorption selectivity in mixed mineral systems	03. Flotation Chemistry	311
733	Physicochemical observations during process water reuse in flotation of oxide copper-cobalt ore	03. Flotation chemistry	312
893	The flotation study on the arsenic rejection from lead concentrate using aluminosulfate	03. Flotation Chemistry	313
902	Computer-based study on QSAR of small molecule depressors for chalcopyrite	03. Flotation Chemistry	314
909	Chemical factor effects in saline and hypersaline waters in the flotation of Cu and Cu-Mo ores	03. Flotation Chemistry	315
429	Floating performance of a new mixed chelate collector in reverse floatation of anshan style iron ore	03. Flotation Chemistry	316
671	A thermochemical study of thiol collector surface reactions on galena and chalcopyrite	03. Flotation Chemistry	317
171	REE bearing mineral recovery: A microflotation and surface chemistry study using hydroxamate collectors and citric acid	03. Flotation Chemistry	318
187	Rhodococcus opacus as bioreagent for electro-flotation	03. Flotation Chemistry	319
188	The adsorption mechanism of 3-(dodecyloxy) propan-1-amine on kaolinite (001) surface	03. Flotation Chemistry	320
197	Depression of inherently hydrophobic minerals by hydrolyzable metal cations: Molybdenite depression in seawater	03. Flotation Chemistry	321
238	Flotation of selected copper sulfide minerals in saline waters	03. Flotation Chemistry	322
313	PM40N as a precious metals promoter for Silver recovery from Lead ore in South Asia	03. Flotation Chemistry	323
318	New dialkyldithiophosphates for the flotation of copper, gold and silver containing ores	03. Flotation Chemistry	324
328	New phenylpyrazolone class collector for separation of sulphides of copper-zinc ores	03. Flotation Chemistry	325
402	Polymeric depressants in purification by flotation of molybdenite	03. Flotation Chemistry	326
423	Effect of biosolids and their main components in the concentration of copper sulphide ores	03. Flotation Chemistry	327
533	Effect of water composition on flotation of lead and zinc sulphide ore	03. Flotation Chemistry	328
570	Study on the flotation of auriferous pyrite by Y-89	03. Flotation Chemistry	329
672	The effect of different collectors on iron removal from quartz by flotation	03. Flotation Chemistry	330

903	Applications of first principles in the separation of copper-molybdenum ore	03. Flotation Chemistry	331
603	The role of colloidal precipitates in the interfacial behavior of long-chain ionic surfactants	03. Flotation Chemistry	332
718	Fundamental study of the effect of flotation reagents on copper flotation with seawater	03. Flotation Chemistry	333
76	Using of new water-soluble cationic collector in reverse flotation of hematite	03. Flotation Chemistry	334
